Bonding Tether 2022

Product: Bonding Tether 2022 is designed for use with DriBooth™ films and covers. The tether allows the antistatic films to connect directly to a grounded source, allowing for the rapid dissipation of temporary electrostatic forces. The bonding tether extends a full 1.8 meters with ≤ 1 ohm resistivity.

Benefits: Conductive grounding tether with fire retardant sheathing
Ideal for use with GrateSavers™ and BoothSaver™ films
 ≤ 1 ohm resistivity

Usage: Use per paintbooth shop standards. The clips can be attached to all DriBooth™ products.

Packaging: M12022-108 (1.8m extended length),
